New Look. New Features. John Bean Wheel Aligners

Conway, AR – August 26, 2019 – The John Bean® family of wheel aligners has a new look. In addition to a new sharp appearance, *John Bean* wheel aligners continue to provide the productivity-enhancing features and innovative technology that set them apart in the marketplace.

John Bean wheel aligners, including the V3300, V2380 and V2280, provide shops with outstanding performance at an exceptional value, each offering distinct advantages for shops seeking to increase their wheel alignment business.

The *John Bean* [V3300](#) is the fast and flexible way to rev up alignment revenue. Designed from the ground up to provide the fastest possible, error-free alignments, the V3300 features a next-generation user interface and provides intelligent predictive alignment flow for high-volume customers. In addition, video speed cameras constantly monitor the alignment and provide critical information to get the job done right the first time.

The *John Bean* [V2380](#) is designed for volume workshops that need an independent beam and cabinet for mobility and more installation flexibility. It provides superior performance and does not require extensive training or experience to operate. With the latest XD target and camera system, the V2380 features advanced technology, combined with the simplest, most intuitive software ever offered, providing the essential tools for any alignment tech.

The *John Bean* [V2280](#) offers shops complete performance at an affordable price. Easy to use, fast to setup and flexible installation, the V2280 supplies core alignment readings to service technicians quickly and efficiently.

New productivity enhancing features for these aligners include online connectivity that when connected to the internet, the aligners can quickly access vehicle specifications and OEM repair procedures for ADAS repairs as well as provide fast and easy software and vehicle specification updates. In addition, the new online report management feature allows shop aligner reports to be printed, emailed or texted from anywhere, improving shop efficiency and customer service.

“In addition to sporting a new look, these redesigned aligners provide the innovative technology and ease of use that that our customers have come to expect from John Bean,” said Adam Brown, director of product management for John Bean. “For shops looking to move their alignment business in a new positive direction, these three aligners offer the superior productivity, time-saving efficiency and added flexibility required to improve the bottom line”

Customers can find out more about the new look *John Bean* V3300, V2380 and V2280 Wheel Alignment Systems and other automotive wheel service and collision repair products by calling 877-482-4866 or visiting www.JohnBean.com.
