

FOR IMMEDIATE RELEASE:

**Mueller-Kueps Uni Hook Kit No. 905 024**

After much success with the neon green flexible Uni Hooks (No. 905 022) we had a lot of requests for a sturdier Uni Hook. The **Mueller Kueps Uni Hook Kit Solid**, No. 905 024, allows the user to safely hang any brake calipers especially the larger and heavier ones, and if necessary cables or hoses.

The Uni Hook has been made with an steel core to give the tool a sturdy feel, making it able to carry many times its own weight. These Uni Hooks are a helpful addition to any shop as they have universal application. A bright orange design, makes it easy to see in the overall clutter of day to day life.

For more information please ask your local tool dealer or contact us directly at
