

New! Hunter introduces new low-profile, high-capacity RX14 lift rack

March 23, 2018

Las Vegas, NV –

Hunter's new RX14 Scissor Lift provides massive capacity with a small footprint. The RX14 Fully Integrated Alignment speeds alignment service by 60% with synchronized aligner and lift rack. FIA automatically locks and unlocks turnplates and slipplates and Inflation Station automatically inflates tires. Plus, FIA error proofs your alignments by automating technician tasks.

The RX14 also features exclusive, enhanced capabilities including, 50% faster descent speed and 9,000-lb. capacity swing air jacks.

The new RX14 alignment lift rack will be demonstrated alongside Hunter's HawkEye Elite alignment system at NADA 2018 in booth #2040C.

Hunter Engineering Company® is the global leader in wheel and tire service, alignment systems, brake service and inspection lane equipment. Hunter® equipment is approved and used by vehicle manufacturers, automobile and truck dealers, tire dealers and service facilities around the world.
