New Brushless In-Tank Fuel Pump Kit From TI Automotive Supports Up To 1000 HP

Auburn Hills, Mich. – August 27, 2019 - TI Automotive's new brushless in-tank fuel pump kit, BKS1000, can support up to 1000 horsepower applications. The kit includes TI Automotive's in-tank brushless screw pump and a stand-alone pump controller with simple power and ground connectivity designed to provide optimal output of the in-tank screw pump. Includes an inlet filter, wiring harness, instruction sheet, and wiring diagram to assist with user installation. For more information about TI Automotive, visit www.tiautomotive.com/aftermarket.
